Projects

Clash Tournament Hub: *Lead Developer* [\[Live\]](#) [↗](#)

- Designed and delivered a Tournament Management platform for the game Clash of Clans using Next.js.
- Implemented user authentication, public profiles, team creation and a team leadership system.
- Integrated the Competitive Clash API to verify match results and generate and update the brackets automatically.
- Built an admin dashboard allowing users to interactively make changes to a tournament or a bracket accordingly.

Ideation: *Owner, Lead Developer* [\[Live\]](#) [↗](#) | [\[Github\]](#) [↗](#)

- Designed and built a project discovery platform to help students and early developers identify the right practice projects, reducing decision paralysis during skill-building.
- Designed a recommendation system that aligns projects with user skill level, interests, and effort capacity.
- Led end-to-end development, including system design, frontend integration and deployment.
- Developed the application using Next.js, React and Tailwind CSS, with modular components and a scalable data model using MongoDB and Mongoose.
- Demonstrated product thinking, initiative, and execution by delivering a complete, user-facing application independently.
